INFO LETTER – REACH

Dear business partner,

The European Chemical Agency (ECHA) has included lead to the SVHC list of material for special attention as possible toxic impact:

<https://www.echa.europa.eu/-/ten-new-substances-added-to-the-candidate-list>

According to the REACH guidelines, Article 33, we are obliged to inform that the copper based alloys used in our products contains more than 0,1% of a substance listed on the SVHC list of REACH (<https://echa.europa.eu/candidate-list-table>).

Depending what brass alloy that's used, it may contain lead up to 3,5%. This due to the machining of brass products. Lead is an added substance to the alloy, which remain in the finished product.

Please also see the last update in June 2020 of EC No 1907/2006 :

https://eur-lex.europa.eu/legal-content/EN/TXT/?uri=uriserv:OJ.L_.2020.203.01.0028.01.ENG

Best Regards

Gunnar Genander

CEO Mattsson Metal AB
